ABSTRACT

Digital ownership has become increasingly important in recent years, and Non-Fungible Tokens (NFTs) have emerged as a way to verify and authenticate ownership of digital assets like art, music, and video games. The gaming and entertainment industries have been quick to adopt NFTs, creating unique experiences, rewarding fans, and exploring new revenue streams. NFTs are also being explored in finance, real estate, and identity verification, and have the potential to revolutionize how we think about ownership and transfer of digital assets. This webinar will delve into the origins and latest trends of NFTs. It will explore how this technology has evolved and how it has been applied in various industries. It will discuss the challenges that come with implementing NFTs and the potential impact they could have on digital ownership.

SPEAKER'S BIO

Prashish Rajbhandari is the founder of Bridge23, a company that focuses on developing innovative solutions for blockchain technology, with a particular emphasis on NFTs and gaming. Prashish has held several prominent positions throughout his career. He has served as the Chief Technology Officer (CTO) at Advanced Pedagogy, an EdTech company based in Singapore, where he oversaw the development of cutting-edge educational technology solutions. Prashish has also served as an early engineer at one of the largest FinTech companies in Mexico. He has also worked as an advisor and consultant at several companies, where he has helped organizations develop effective technology strategies. He graduated with a Master of Computer Science degree from the University of Cincinnati, Ohio, USA, and Bachelor's degree from IIIT, Allahabad.

ABOUT APNG

Asia Pacific Next Generation (APNG) <<https://apng.asia/>> is a non-profit organization dedicated to the advancement of internetworking infrastructure in the Asia Pacific region and to the research and development of all associated enabling technologies. Its key mission, among others is to contribute Digital Growth in the Asia Pacific (AP) region. APNG empowers the Next Generation in Asia Pacific by organising annual APNG Camps, sharing information amongst the community, understanding the digital divide in each Asia Pacific country to overcome them, advancing digital transformations, contributing at regional forums, creating new opportunities for its members, and organising webinars on emerging topics in technology.

ABOUT APNG WEBINARS

APNG (Asia Pacific Next Generation) <<https://apng.asia/>> is an arena in which future leaders of the digital society in the Asia Pacific region gather to build a human network and learn from each other. Asia Pacific Next Generation has offered resources and discussions for multi-stakeholders from different regions to challenge the digital divide. We had a successful year of 2020, 2021, and 2022 webinars, where our esteemed and expert speakers spoke on a range of topics on emerging technologies from Research and Practice on Blockchains to Artificial Intelligence. APNG organises webinars on the third Saturdays of the even months (February, April, June, August, October, and December) of the calendar year. The 1 hour webinar starts at 12:00PM UTC +9.
