APNG WEBINAR

INFORMATION SECURITY RISK MANAGEMENT

By Dr Benfano Soewito

DATE & TIME	WEBINAR REGISTRATION	FURTHER DETAILS
Saturday, 20 August, 2022 **12:00 PM (UTC +9)**	https://apnic.zoom.us/webinar/register/WN_F7jH-xUSQk6BjLaJ1ZyqBw	https://apng.asia/webinars

ABSTRACT

Information security risk management, also called IT risk management, consists of the policies, procedures, and technologies that a company uses to mitigate threats from malicious actors and reduce information technology vulnerabilities, whether it is software vulnerabilities, vulnerable configurations, obsolete packages, or a range of other issues related to the threats and risks associated with the use of new technologies. Effective risk management means attempting to control, as much as possible, future outcomes by acting proactively rather than reactively.

This webinar describes how to build the foundation for a comprehensive security program, calculating risks, and processes necessary to develop that foundation into a mature vulnerability assessment and risk management program.

SPEAKER'S BIO

Benfano Soewito is an associate professor at the University of Bina Nusantara, Indonesia, where he teaches and conducts research in the fields of networking, internet security, and Internet of Things (IoT). Benfano has been working as a researcher in the IT field since completing his master's degree and doctorate in Southern Illinois University with a focus on network and internet system security. Benfano has more than two decades of experience as a researcher and has published more than 160 papers in conferences proceedings and reputable journals. Benfano has also worked in the industry as an IT specialist to solve software problems and hardware problems associated with the internet infrastructure to ensure the system operates properly and safely. He is an accomplshed academic, researcher and an affluent speaker on IT topics.

ABOUT APNG

Asia Pacific Next Generation (APNG) <https://apng.asia/> is a non-profit organization dedicated to the advancement of internetworking infrastructure in the Asia Pacific region and to the research and development of all associated enabling technologies. Its key mission, among others is to contribute Digital Growth in the Asia Pacific (AP) region. APNG empowers the Next Generation in Asia Pacific by organising annual APNG Camps, sharing information amongst the community, understanding the digital divide in each AP country to overcome them, advancing digital transformations, contributing at regional forums, creating new opportunities for its members, and organising webinars on emerging topics in technology.

ABOUT APNG WEBINARS

APNG (Asia Pacific Next Generation) <https://apng.asia/> is an arena in which future leaders of the digital society in the Asia Pacific region gather to build a human network and learn from each other. Asia Pacific Next Generation has offered resources and discussions for multi-stakeholders from different regions to challenge the digital divide. We had a successful year of 2020 and 2021 webinars, where our esteemed and expert speakers spoke on a range of topics on emerging technologies from Research and Practice on Blockchains to Artificial Intelligence. APNG organises webinars on the third Saturdays of the even months (February, April, June, August, October, and December) of the calendar year. The 1 hour webinar starts at 12:00PM UTC +9.
